SUBJECT: Installation of MSS 20.11j

        The hardcore system, MSS 20.11j, was installed at 9:50 AM on
Friday, September 21, 1973. This system included a fix for a
status handling bug for the DataNet 355, a temporary fix for a
reused address bug, making the trap previously installed correct
the problem without crashing, and a change to act_proc to give
all processes an initial working set size of 0. Teh system
libraries were updated at 2:55 PM on Friday, September 21, 1973.

                    I. System Change Log

Change #   Change

1141   Fixed a DataNet 355 problem that had resulted in I/O
            status being lost.

1142   Modified page control to recover for some reused
            address errors without crashing.

1143   Modified process creation to set working set size to 0
            for all processes.

                    II. Segment Change Log

Segment Name	Bound Segment	Change #
act_proc.pl1	bound_process_creation	R 1143
dn355.pl1	bound_355_wired	R 1141
dn355_util.alm	bound_355_wired	R 1141
page_fault.alm	bound_page_control	R 1142
wired_utility_.alm	bound_sss_wired_	R 1141

Include Files

dn355.incl.pl1		R 1141

III. Bound Segment Change Log

Bound Segment	Change
bound_355_wired	Replaced dn355
	dn355_util
bound_page_control	Replaced page_fault
bound_process_creation	Replaced act_proc
bound_sss_wired_	Replaced wired_utility_

IV. Header Change Log

Change #	Change
1141	Added the name "ldac" to the header entry for bound_sss_wired_.
