FROM: Arlene Scharer

DATE: September 21, 1973

SUBJECT: On Line Installation Changes

The following is a list of changes to the standard service system, maintenance tools, author maintained and installation maintained libraries for the week beginning September 17, 1973.

HOW TO READ THIS LISTING:

Item 1   may be the date the segment was updated.

Item 2   may be the system library in which the segment is maintained.

            TOOLS   Is the maintenance tools library

            SSS   Is the standard service system

            AM   Is the author maintained library
                        (Installation maintained software is
                                currently kept in AM also)

            LANG   Is the languages library.

Item 3   is the name of the object segment or component being updated.

Item 4   is the action which was taken:
                added
                replaced
                deleted
                moved

NOTE: The library name and date will appear only before the names of
            bound segments or single unbound object segments, but will not
            appear before the names of object components within bound
            segments. Therefore, if no date or library name appears, you
            may assume that the name refers to an object component.
            Just trace down to the next date and library name to learn the
            name of the object segment itself.

            Note that changing the name or the language type of a segment
            involves a delete of the old segment and an add of the new
            one.

            Note also that a notation is made when a library segment is
            renamed while it is being updated on the line beneath the
            update line.

```
                      update_seg replaced

                      upd_doc_task_ replaced

09/18/73:   TOOLS     bound_mls_ replaced

09/18/73:   AM        reformat_line replaced

09/18/73:   SSS       dump_segment deleted

09/18/73:   SSS       decam deleted

09/18/73:   SSS       acm_ deleted

                      oll_abs deleted

                      adjust_blt_count deleted

                      adjust_blt_count_ deleted

                      truncate deleted

                      names deleted

                      fs_chname deleted

                      change_error_mode deleted

                      reprint_error deleted

                      list_ref_names deleted

                      answer deleted

                      user_info_ deleted

                      format_attributes_ deleted

                      nome_dir deleted

                      set_ring_brackets deleted

                      check_info_segs deleted

                      profile_data_ deleted

                      print_motd deleted

                      acm_ added

                      decam added

                      dump_segment added
```

```
09/18/73:   SSS      bound_misc_commands_ replaced

                     format_attributes_ added
09/18/73:   SSS      bound_proj_admin_ replaced

09/18/73:   SSS      runoff_aos deleted

                     pl1_abs added
                     runoff_aos added
09/18/73:   SSS      bound_absentee_com_ replaced

                     set_ring_brackets added
09/18/73:   SSS      bound_access_commands_ replaced

09/18/73:   SSS      setquota deleted

                     adjust_bit_count added
                     adjust_bit_count_ added
                     fs_chname added
                     names added
                     setquota added
                     truncate added
09/18/73:   SSS      bound_fscom2_ replaced

                     home_dir added
09/18/73:   SSS      bound_active_function_ replaced

                        ( renamed from bound_active_fnc_ )

09/18/73:   SSS      ring0_get_ deleted

09/18/73:   SSS      system_info_ deleted

09/18/73:   SSS      where deleted

09/18/73:   SSS      who deleted
```

```
09/18/73:   SSS      mail deleted

09/18/73:   SSS      help deleted

09/18/73:   SSS      resource_usage deleted

                     check_info_segs added
                     help added
                     list_ref_names added
                     mail added
                     print_motd added
                     profile_data_ added
                     resource_usage added
                     ring0_get_ added
                     system_info_ added
                     user_info_ added
                     where added
                     who added

09/18/73:   SSS      bound_info_rtns_ added

09/18/73:   SSS      command_query_ deleted

09/18/73:   SSS      arror_table_compiler deleted

09/18/73:   SSS      set_com_line deleted

09/18/73:   SSS      prepare_mc_restart_ deleted

09/18/73:   SSS      program_interrupt deleted

09/18/73:   SSS      progress deleted

09/18/73:   SSS      record_command_usage_ deleted

09/18/73:   SSS      ready deleted
```

answer added

change_error_mode added

command_query_ added

error_table_compiler added

prepare_mc_restart_ added

program_interrupt added

progress added

ready added

record_command_usage_ added

reprint_error added

set_com_line added

09/18/73:   SSS   bound_command_env_ added

gcos_gsr_read_ deleted

gcos_gsr_write_ deleted

gcos_read_ replaced

gcos_read_tape_ replaced

09/19/73:   TOOLS   bound_gcos_daemon_ replaced

gcos_gsr_read_ added

gcos_gsr_write_ added

gcos_sysprint added

gcos_syspunch added

gcos_sys_xlate_ added

09/19/73:   TOOLS   bound_gcos_utilities_ added

gcos_convert_sst replaced

gcos_print_file replaced

gcos_make_tape replaced

gcos_read_line_ replaced

09/19/73:   TOOLS   bound_gcos_daemon_tls_ replaced

09/20/73:   SSS   ipc_message_facility_ added

09/21/73:   AM   old_ipc_message_facility_ replaced

                              (renamed from ipc_message_facility_)

                       convert_characters added

09/21/73:   SSS   bound_misc_commands_ replaced
