

TO: MIB Distribution
 FROM: Arlene Scherer
 DATE: October 5, 1973
 SUBJECT: Online Installation Changes

The following is a list of changes to the standard service system, maintenance tools, author maintained and installation maintained libraries for the week beginning October 30, 1973.

HOW TO READ THIS LISTING:

- Item 1 may be the date the segment was updated.
- Item 2 may be the system library in which the segment is maintained.
- TOOLS is the maintenance tools library
- SSS is the standard service system
- AM is the author maintained library
 (installation maintained software is
 currently kept in AM also)
- LANG is the languages library.
- Item 3 is the name of the object segment or component being updated.
- Item 4 is the action which was taken:
 added
 replaced
 deleted
 moved

NOTE: The library name and date will appear only before the bound segments or single unbound object segments, but will not appear before the names of object components within bound segments. Therefore, if no date or library name appears, you may assume that the name refers to an object component. Just trace down to the next date and library name to learn the name of the object segment itself.

Note that changing the name or the language type of a segment may involve a delete of the old segment and an add of the new one.

Note also that a notation is made when a library segment is renamed at the same time that it is being replaced in the libraries. This notation will appear as another line in parentheses below the objectname line.
