DATE: October 12, 1973

SUBJECT: Online Installation Changes

The following is a list of changes to the standard service system,
maintenance tools, author maintained and installation maintained
libraries for the week beginning October 09, 1973.

     HOW TO READ THIS LISTING:

Item 1   may be the date the segment was updated.

Item 2   may be the system library in which the segment is maintained.

                    TOOLS   is the maintenance tools library

                    SSS   is the standard service system

                    AM   is the author maintained library
                                (installation maintained software is
                                          currently kept in AM also)

                    LANG   is the languages library.

Item 3   is the name of the object segment or component being updated.

Item 4   is the action which was taken:
                         added
                         replaced
                         deleted
                         moved

NOTE: The library name and date will appear only before the names of
                    bound segments or single unbound object segments, but will not
                    appear before the names of object components within bound
                    segments. Therefore, if no date or library name appears, you
                    may assume that the name refers to an object component.
                    Just trace down to the next date and library name to learn the
                    name of the object segment itself.

                    Note that changing the name or the language type of a segment
                    may involve a delete of the old segment and an add of the
                    new one.

                    Note also that a notation is made when a library segment is
                    renamed at the same time that it is being replaced in the
                    libraries. This notation will appear as another line in
                    parentheses below the objectname line.

10/09/73: TOOLS   bound_oprcons_ replaced

                     dump_segment replaced

10/09/73: SSS   bound_misc_commands_ replaced

                     msl_util1 replaced

10/12/73: TOOLS   bound_msl_ replaced
