FROM: Arlene Scherer

DATE: October 26, 1973

SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system,
maintenance tools, author maintained and installation maintained
libraries for the week beginning October 23, 1973.

         HOW TO READ THIS LISTING:

Item 1   may be the date the segment was updated.

Item 2   may be the system library in which the segment is maintained.

                    TOOLS   is the maintenance tools library

                    SSS   is the standard service system

                    AM   is the author maintained library
                                (Installation maintained software is
                                         currently kept in AM also)

                    LANG   is the languages library.

Item 3   is the name of the segment or component being updated.

Item 4   is the action which was taken:
                    added   replaced
                    deleted   moved

NOTE: The library name and date will appear only before the names of
            bound segments or single unbound segments, but will not
            appear before the names of object components within bound
            segments. Therefore, if no date or library name appears,
            you may assume that the name refers to an object component.
            Just trace down to the next date and library name to learn the
            name of the object segment itself.

            Note that a notation is made when a library segment is
            renamed at the same time that it is being replaced in the
            libraries. This notation will appear as another line in
            parentheses below the objectname line.

            Note also that help files are recorded as a one-line change
            as if they were object segments.

10/26/73:   AM   convert_char_codes deleted

10/26/73:   IIS   convert_char_codes.info deleted

                       copy_dump_seg_ replaced

                       online_dump replaced

10/26/73:   TOOLS   bound_od_ replaced

                       io_daemon replaced

10/26/73:   TOOLS   bound_io_daemon_ replaced

                       msa_manager_ replaced

10/26/73:   TOOLS   bound_utility_tools_ replaced

                       get_seg_ptr_ replaced

10/26/73:   TOOLS   bound_teco_ replaced

                       user replaced

                       system added

10/26/73:   SSS   bound_full_cp_ replaced
