SUBJECT: Installation of MSS 21.4a

The hardcore system, MSS 21.4a, was installed at 22:35 on Thursday, November 29, 1973. This system consisting of changes #1197 and 1198, fixed a bug in link\_snap (as of MSS 21.4) which resulted in occasional crawlouts from ring 0 and a bug in backup\_load (as of MSS 21.3) which resulted in that procedure being unuseable without phcs\_access. The hardcore libraries were updated at 11:25 on Friday, November 30, 1973.
