Subject: Installation of MSS 21.5a

The hardcore system, MSS 21.5a, was installed at 8:20 AM on
Wednesday, December 5, 1973. Change # 1200, which replaced the
unbound segment slt_manager.alm, modified the code used for a
string comparison to avoid a repeat double hardware problem that
had caused problems on the development system. The system
libraries were updated at 11:20 AM on Wednesday, December 5, 1973.
