TO: MIB DISTRIBUTION

FROM: Arlene Scherer

DATE: December 14, 1973

SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system,
maintenance tools, author maintained and installation maintained
libraries for the week beginning December 10, 1973.

          HOW TO READ THIS LISTING:

Item 1   may be the date the segment was updated.

Item 2   may be the system library in which the segment is maintained.

            TOOLS   is the maintenance tools library

            SSS   is the standard service system

            AM   is the author maintained library
                        (installation maintained software is
                                 currently kept in AM also)

            LANG   is the languages library.

Item 3   is the name of the segment or component being updated.

Item 4   is the action which was taken:
              added   replaced
              deleted   moved

NOTE: The library name and date will appear only before the names of
            bound segments or single unbound segments, but will not
            appear before the names of object components within bound
            segments. Therefore, if no date or library name appears,
            you may assume that the name refers to an object component.
            Just trace down to the next date and library name to learn the
            name of the object segment itself.

            Note that a notation is made when a library segment is
            renamed at the same time that it is being replaced in the
            libraries. This notation will appear as another line in
            parentheses below the objectname line.

            Note also that help files are recorded as a one-line change
            as if they were object segments.

_____

```
                        sog_ring_0_info_ replaced
12/12/73:   TOOLS   bound_sog_ replaced

                        meter_gate replaced
12/12/73:   TOOLS   bound_misc_metering_ replaced

12/12/73:   IIS     pending_changes.info replaced

12/12/73:   IIS     subtree_status.info added

                        backup_dump replaced
                        backup_dump_recurse replaced
12/13/73:   TOOLS   bound_dumper_ replaced

12/13/73:   AM      allaccess replaced

12/14/73:   INFO    gedx_changes.info replaced

                        message_coordr_ replaced
12/14/73:   TOOLS   bound_oprcons_ replaced
```
