Subject: Installation of Salvager 2.26

The salvager system, 2.26, was updated at 11:45 AM on Friday, December 21, 1973. Change # 0001, which replaced salvager.pl1 in bound_offline_salvager, fixed a bug by preventing the salvager from running in active mode. Change # 0002 (Multics Change # 1174), which replaced init_salv_fsdcts.pl1 in bound_offline_salvager, added the ability to run a DSU-190 disk which has been configured as a DSU-270 disk. Change # 0003 (Multics Change # 1207), which replaced init_salv_fsdcts.pl1 and salv_esd.pl1 in bound_offline_salvager, added the ability to add disk storage to Multics by using the salvager and fixed a bug in the operation of emergency shutdown in the salvager. There were no changes to the salvager edit_header.
