

TO: MIB DISTRIBUTION
 FROM: Arlene Scherer
 DATE: January 4, 1973
 SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system, maintenance tools, author maintained and installation maintained libraries for the week beginning January 2, 1973.

HOW TO READ THIS LISTING:

- Item 1 may be the date the segment was updated.
 Item 2 may be the system library in which the segment is maintained.

TOOLS is the maintenance tools library
 SSS is the standard service system
 AM is the author maintained library
 (installation maintained software is currently kept in AM also)
 LANG is the languages library.

- Item 3 is the name of the segment or component being updated.
 Item 4 is the action which was taken:
 added replaced
 deleted moved

NOTE: The library name and date will appear only before the names of bound segments or single unbound segments, but will not appear before the names of object components within bound segments. Therefore, if no date or library name appears, you may assume that the name refers to an object component. Just trace down to the next date and library name to learn the name of the object segment itself.

Note that a notation is made when a library segment is renamed at the same time that it is being replaced in the libraries. This notation will appear as another line in parentheses below the objectname line.

Note also that help files are recorded as a one-line change as if they were object segments.

Multics Project internal working documentation. Not to be reproduced or distributed outside the Multics Project.

01/03/74: IIS message_of_the_day replaced
eax_util_ replaced
get_addr_ replaced
qedx replaced
01/04/74: SSS bound_qedx_ replaced
01/04/74: INFO qedx_changes.info replaced
listing_tape_print replaced
lts_output_ replaced
01/04/74: TOOLS bound_listing_tape_ replaced
get_equal_name_ replaced
01/04/74: SSS bound_fscom2_ replaced
01/04/74: INFO star_equals.info replaced
