SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system,
maintenance tools, author maintained and installation maintained
libraries for the week beginning July 8, 1974.

    HOW TO READ THIS LISTING:

    Each modification is preceded by the MCR number covering
    it (if there is one), and a brief explanation of the
    change.

    This information is followed by the name of the object
    segment, help file, include file, or bound segment
    (or group of the above) involved in the modification.

    Also given is the date and time of installation,
    and the name of the system library to which the change
    was made.

    For bound segments, a list of the components follows,
    as well as the action which was taken with regard to
    each component.

    An explanation does not accompany the listing of a
    segment which was "de-installed", or removed because
    of some problem, but the original installation infor-
    mation may be considered inoperative.

*****
