Subject: Installation of MSS 23.18a

The hardcore system, MSS 23.18a, was installed at 1:04 AM on Friday, September 13, 1974. Change # 1366 (no MCR), which replaced parity_fault.pll in bound_error_active and the unbound segments fim.alm, pds.alm and prds.alm, modified the handling of history register data after an op-not-complete in order to dump them more reliably into the syserr log. The system libraries were updated at 1:40 PM on Friday, September 13, 1974.
