SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system,
maintenance tools, author maintained and installation maintained
libraries for the week beginning September 30, 1974.

HOW TO READ THIS LISTING:

Each modification is preceded by the MCR number covering
it (if there is one), and a brief explanation of the
change.

This information is followed by the name of the object
segment, help file, include file, or bound segment
(or group of the above) involved in the modification.

Also given is the date and time of installation,
and the name of the system library to which the change
was made.

For bound segments, a list of the components follows,
as well as the action which was taken with regard to
each component.

An explanation does not accompany the listing of a
segment which was "de-installed", or removed because
of some problem, but the original installation infor-
mation may be considered inoperative.

09/30/74   1019.4   new_initial_proc.info added to IIS

*****
MCR 580: The archive command was changed to not regard an
archive as protected if the safety switch is on (for updating
purposes).

10/04/74   1339.3   bound_archive_ replaced in SSS

        replaced: archive

*****
No MCR: A procedure called basic_plot_ was added to the AML to
allow Basic programs to use the "plot_" facility.

10/04/74   1345.4   basic_plot_ added to AM

10/04/74   1345.4   basic_plot_.info added to IIS

*****
No MCR yet: Segment bound_full_cp_ was replaced to fix the
exists active function to allow for the recognition of an msf.

10/04/74   1554.7   bound_full_cp_ replaced in SSS

        replaced: exists

10/04/74   1554.7   special_active_functions.info replaced in INFO

2)
