SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system,

tools, network, unbundled, author maintained and installation

maintained libraries for the week beginning October 29, 1974.

> HOW TO READ THIS LISTING:
>
> Each modification is preceded by the MCR number covering
> it (if there is one), and a brief explanation of the
> change.
>
> This information is followed by the name of the object
> segment, help file, include file, or bound segment
> (or group of the above) involved in the modification.
>
> Also given is the date and time of installation,
> and the name of the system library to which the change
> was made.
>
> For bound segments, a list of the components follows,
> as well as the action which was taken with regard to
> each component.
>
> An explanation does not accompany the listing of a
> segment which was "de-installed", or removed because
> of some problem, but the original installation infor-
> mation may be considered inoperative.

*****
No MCR: cg_ in bound_cg_ (LANG) was replaced in an emergency
installation to fix a problem which resulted in linkage errors
while doing fortran input/output.

*****
No MCR: The ARPA Network host table was updated to bring it up
to date and correct errors.

10/31/74 1359.3   host_table replaced in TOOLS

*****
No MCR: New active function translate was added to AML. Please
type "help translate".

10/31/74 1429.5   translate added to AM

10/31/74 1429.5   translate.info added to IIS

*****
MCR 794: Segment bound_iodd_ in T was replaced to fix a bug in
the I/O daemon driver whereby a "detach" to a remote device
followed by an "attach" resulted in an error because the attach
mode was incorrectly specified.

10/31/74 1451.3   bound_iodd_ replaced in TOOLS

        replaced: remote_
                     input_cmd_

*****
MCR's 781, 786: A bug was fixed in delete_ which caused a
linkage error for an invalid error_table_ entry. At the same
time, delete_ was upgraded to work with the Access Isolation
Mechanism.

10/31/74 1511.6   bound_fscom1_ replaced in SSS

        replaced: delete_

*****
MCR 309: In bound_mseg_ a bug was fixed in mseg_ and mseg_own_
whereby calling a file entry with the name of a nonexistent
message segment caused a reference through a null pointer.

10/31/74 1531.5   bound_mseg_ replaced in SSS

        replaced: mseg_
                     mseg_own_

*****
No MCR yet: The pl1_abs command was replaced to shorten option
strings passed to ear, to prevent the message "expanded command
line too long".

11/01/74 1414.1   bound_absentee_com_ replaced in SSS

        replaced: pl1_abs
