SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system,

tools, network, unbundled, author maintained and installation

maintained libraries for the week beginning November 11, 1974.

HOW TO READ THIS LISTING:

Each modification is preceded by the MCR number covering
it (if there is one), and a brief explanation of the
change.

This information is followed by the name of the object
segment, help file, include file, or bound segment
(or group of the above) involved in the modification.

Also given is the date and time of installation,
and the name of the system library to which the change
was made.

For bound segments, a list of the components follows,
as well as the action which was taken with regard to
each component.

An explanation does not accompany the listing of a
segment which was "de-installed", or removed because
of some problem, but the original installation infor-
mation may be considered inoperative.
