MULTICS INSTALLATION BULLETIN

TO: MIB DISTRIBUTION

FROM: Arlene Scherer

DATE: December 20, 1974

SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system, tools, network, unbundled, author maintained and installation maintained libraries for the week beginning December 16, 1974.

HOW TO READ THIS LISTING:

Each modification is preceded by the MCR number covering it (if there is one), and a brief explanation of the change.

This information is followed by the name of the object segment, help file, include file, or bound segment (or group of the above) involved in the modification.

Also given is the date and time of installation, and the name of the system library to which the change was made.

For bound segments, a list of the components follows, as well as the action which was taken with regard to each component.

An explanation does not accompany the listing of a segment which was "de-installed", or removed because of some problem, but the original installation information may be considered inoperative.

*****
MCR 584: The new administrator tools for managing project
registration were added to T
  today, in the segment bound_admin_rtnes_. They include
commands new_proj, edit_proj, rename_proj, and delete_proj.
Subroutine parse_attributes_ was also added. The exec-com
master.ec was replaced, as was the include segment
sys_admin_data.incl.pl1.

12/16/74   1524.6   bound_admin_rtnes_ replaced in TOOLS

           added: new_proj
                        rename_proj
                        edit_proj
                        edit_proj_
                        delete_proj
                        parse_attributes_

        replaced: admin_util
                        bound_admin_rtnes_.bind

12/16/74   1524.6   sys_admin_data.incl.pl1 replaced in INCL

12/16/74   1524.6   master.ec replaced in TOOLS

*****
MCR 611, 707: Bugs were fixed in the gcos simulator with the
replacement of bound_gcos_, bound_gcos_utilities_ and unbound
segment execute_search_rules_ in SSS. Include segments
gcos_flags_.ip, gcos_ext_stat_.ip, gcos_file_info_block_.ip and
gcos_utility_args_.ip were replaced. Please type "help gcos",
"help gcos_sysprint", and "help gcos_card_utility".

12/16/74   1635.8   bound_gcos_ replaced in SSS

           added: gcos_attach_file_

        replaced: gcos
                        gcos_abort_
                        gcos_cc_abort_
                        gcos_cc_activity_cards_
                        gcos_cc_caller_
                        gcos_cc_data_
                        gcos_cc_directive_cards_
                        gcos_cc_endjob_
                        gcos_cc_file_cards_
                        gcos_cc_goto_
                        gcos_cc_ident_
                        gcos_cc_incode_
                        gcos_cc_limits_
                        gcos_cc_loader_cards_
                        gcos_cc_misc_cards_
                        gcos_cc_set_
                        gcos_cc_snumb_
                        gcos_cc_update_
                        gcos_check_for_mme_
                        gcos_cleanup_files_
                        gcos_close_file_
                        gcos_control_tables_

```
                        gcos_cv_ascii_gebcd_
                        gcos_cv_gebcd_ascii_
                        gcos_dump_slave_
