DATE: March 7, 1975

SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system,
tools, network, unbundled, author maintained and installation
maintained libraries for the week beginning March 3, 1975.

HOW TO READ THIS LISTING:

Each modification is preceded by the MCR number covering
it (if there is one), and a brief explanation of the
change.

This information is followed by the name of the object
segment, help file, include file, or bound segment
(or group of the above) involved in the modification.

Also given is the date and time of installation,
and the name of the system library to which the change
was made.

For bound segments, a list of the components follows,
as well as the action which was taken with regard to
each component.

An explanation does not accompany the listing of a
segment which was "de-installed", or removed because
of some problem, but the original installation infor-
mation may be considered inoperative.

*****
MCR 815: Provides a new Multics standard tape I/O module that
interfaces directly with iox_. It is the eventual replacement
for tape_.

03/05/75 0923.8   bound_tape_mult_ added to SSS

          added: tape_mult_write_
                     tape_mult_read_
                     tape_mult_labeler_
                     tape_mult_attach_
                     tape_mult_parse_
                     tape_mult_open_
                     tape_mult_close_
                     tape_mult_detach_
                     tape_mult_util_
                     bound_tape_mult_.bind
