SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system,

tools, network, unbundled, author maintained and installation

maintained libraries for the week beginning March 17, 1975.

            HOW TO READ THIS LISTING:

            Each modification is preceded by the MCR number covering
            it (if there is one), and a brief explanation of the
            change.

            This information is followed by the name of the object
            segment, help file, include file, or bound segment
            (or group of the above) involved in the modification.

            Also given is the date and time of installation,
            and the name of the system library to which the change
            was made.

            For bound segments, a list of the components follows,
            as well as the action which was taken with regard to
            each component.

            An explanation does not accompany the listing of a
            segment which was "de-installed", or removed because
            of some problem, but the original installation infor-
            mation may be considered inoperative.

*****
No MCR: The component link_unsnap_ of bound_ti_term_ was
replaced to correspond to the recent hardcore installation of
MSS 25.3.

03/19/75   1515.5   bound_ti_term_ replaced in SSS

     replaced: link_unsnap_

03/19/75   1515.5   iot.incl.pl1 replaced in INCL

*****
MCR 152:   The segment indent was replaced to perform additional
error checking, and, to improve the format of for multi-line IF
statements. Please type "help indent" and "help
indent_changes".

03/27/75   0954.3   bound_misc_commands_ replaced in SSS

     replaced: indent

*****

03/27/75   1000.4   indent.info replaced in INFO

03/27/75   1000.4   indent_changes.info replaced in INFO

*****
MCR 156:   The hardcore updater was modified to take advantage of
255K source archives.

03/27/75   1008.6   bound_updater_ replaced in TOOLS

     replaced: source_update

*****
MCR 153:   The map355 and build355 commands were modified to get
the shortest pathname to the process directory without requiring
's' access on >pdd.

03/27/75   1011.5   bound_dn355_tools_ replaced in TOOLS

     replaced: map355
                    build355

*****
MCR 155:   trace_stack was replaced to find the true condition
frame for conditions which re-signal "error" and support
procedures; and, to improve output messages for interpret_ptr
and list_frame_args_.

03/27/75   1014.0   bound_trace_stack_ replaced in SSS

     replaced: trace_stack_
                    interpret_ptr_
                    list_frame_args_
                    dump_machine_cond_
