Subject: Installation of BOS 1.43

The BOS system 1.43 was updated at 9:10 AM on Wednesday, April 23, 1975. Change # 0032 (MCR 949) fixed a problem with BOS hanging on the card reader by replacing readc.incl.alm and recompiling loadm.alm, setup.alm, and util.alm. Change # 0033 (MCR 989), which replaced apnd.alm and added a BOS-only copy of bulk_store_mailbox.incl.alm, brought the BOS appending package up to date with the version of page control installed in MSS 25.5. There were no changes to the BOS header.
