SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system,

tools, network, unbundled, author maintained and installation

maintained libraries for the week beginning April 21, 1975.

   HOW TO READ THIS LISTING:

   Each modification is preceded by the MCR number covering
   it (if there is one), and a brief explanation of the
   change.

   This information is followed by the name of the object
   segment, help file, include file, or bound segment
   (or group of the above) involved in the modification.

   Also given is the date and time of installation,
   and the name of the system library to which the change
   was made.

   For bound segments, a list of the components follows,
   as well as the action which was taken with regard to
   each component.

   An explanation does not accompany the listing of a
   segment which was "de-installed", or removed because
   of some problem, but the original installation infor-
   mation may be considered inoperative.
