Subject: Installation of BOS 1.44

The BOS system 1.44 was updated at 2:15 PM on Thursday, June 26, 1975. This system included the addition of SST name table processing, the addition of an MPC dumping facility, and fixes for bugs in the handling of the card reader, in the FMT command and in the CORE command.

I. System Change Log

<u>Chng</u>	<u>MCR</u>	<u>Change</u>
0034	0803	Added the capability to process the SST name table to BOS.
1161		Added a command to allow the dumping of storage and trace tables in an MPC.
1162		Fixed a bug in the card reading module which had caused attempts to read cards after an EOF card has been read.
1198		Fixed a bug in the FMT command which had resulted in being unable to format packs on disk subsystems other than that on which BOS resided.
1200		Fixed a bug in the CORE command which had caused it to ignore arguments to the command.

Multics Project internal working documentation. Not to be reproduced or distributed outside the Multics Project.
