SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system,

tools, network, unbundled, author maintained and installation

maintained libraries for the week beginning June 30, 1975.

    HOW TO READ THIS LISTING:

    Each modification is preceded by the MCR number covering
    it (if there is one), and a brief explanation of the
    change.

    This information is followed by the name of the object
    segment, help file, include file, or bound segment
    (or group of the above) involved in the modification.

    Also given is the date and time of installation,
    and the name of the system library to which the change
    was made.

    For bound segments, a list of the components follows,
    as well as the action which was taken with regard to
    each component.

    An explanation does not accompany the listing of a
    segment which was "de-installed", or removed because
    of some problem, but the original installation infor-
    mation may be considered inoperative.

*****
No MCR: abs_io_ in bound_full_cp_ was changed (temporarily) to
set the bit count for each line in the absout file.

*****
MCR: 957, 970, 1060: Changes have been made to bound_metering
which make new control arguments (-total, -tt) available to the
cumulative_page_trace and gives a new form of output. Please
type "help cumulative_page_trace".

06/30/75   1413.9   bound_metering_ replaced in SSS

        replaced: page_trace
                       cumulative_page_trace

06/30/75   1413.9   cumulative_page_trace.info replaced in INFO

*****
MCR: 1196: Changes were made to bound_segment_info_ so that the
routines now use the new object_info_ structure. This version
also fixes bugs in and adds an entry point to interpret_link_.

06/30/75   1450.1   bound_segment_info_ replaced in SSS

        replaced: print_link_info
                       form_link_info_
                       get_bound_seg_info_
                       interpret_link_
                       form_bind_map_
                       print_bind_map
                       display_component_name
                       component_info_
                       decode_definition_
                       bound_segment_info_.bind

        deleted: object_info_
                       old_print_link_info

*****
MCR: 1173, 1174: Changes have been made to
bound_misc_translatrs_ in the tools library that fixed a bug
which prevented the reduction_compiler from translating semantic
statements properly. Also a commenting facility was added to
the reduction language.

07/02/75   1037.8   bound_misc_translatrs_ replaced in TOOLS

        replaced: reduction_compiler_

+++++

07/02/75   1041.8   bound_misc_translatrs_ de-installed from TOOLS

                       (previously installed 07/02/75   1037.8)

07/02/75   1117.4   bound_misc_translatrs_ replaced in TOOLS

        replaced: reduction_compiler_

*****
MCR: none: An emergency fix to the PL/1 optimizer was installed.

07/02/75 1428.0   bound_lang_util_ replaced in LANG

        replaced: optimizer

07/02/75 1428.0   pl1_version_ replaced in LANG

*****
MCR: 714: A new version of ed_installation_parms has been installed in bound_admin_tools_ in the tools library so that in setting up access isolation, administrators will not be allowed to give categories or levels the names "system_low" or "system_high", as these are user keywords. Default long and short names for level0 will be null strings rather than "level0" and "l0".

07/02/75 1510.3   bound_admin_tools_ replaced in TOOLS

        replaced: ed_installation_parms

*****
MCR: 1165, 1166: A new version of mc_util_ in bound_oprcons_ in the tools library was installed to replace the user ring portion of the old tty_dim with the new lox tty_dim.

07/02/75 1611.9   bound_oprcons_ replaced in TOOLS

        replaced: mc_util_
