SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system, tools, network, unbundled, author maintained and installation maintained libraries for the week beginning July 21, 1975.

HOW TO READ THIS LISTING:

Each modification is preceded by the MCR number covering it (if there is one), and a brief explanation of the change.

This information is followed by the name of the object segment, help file, include file, or bound segment (or group of the above) involved in the modification.

Also given is the date and time of installation, and the name of the system library to which the change was made.

For bound segments, a list of the components follows, as well as the action which was taken with regard to each component.

An explanation does not accompany the listing of a segment which was "de-installed", or removed because of some problem, but the original installation information may be considered inoperative.

MCR: 1301: Changes have been made to bound_proj_admin_ and bound_io_commands_ in the sss library. The changes allow initproc statements in PMF's to contain dollar signs and also handles cut off statements properly.

07/21/75 1039.1 bound_proj_admin_ replaced in SSS

replaced: cv_pmf

07/21/75 1039.1 bound_io_commands_ replaced in SSS

replaced: get_line_length_

MCR: none: The segment get_line_length_ has been deleted from bound_slpb_maint_ in the am library. This change removed the obsolete AML subroutine, which has already been replaced by a compatible subroutine in bound_io_commands_.

07/21/75 1056.5 bound_slpb_maint_ replaced in AM

replaced: bound_slpb_maint_.bind

deleted: get_line_length_

07/21/75 1056.5 get_line_length_.info added to INFO

MCR: 714: The segment user has been replaced in bound_full_cp_ in the sss library. This change fixes a bug which caused the keywords "auth" and "max_auth" to return authorization character strings with a trailing blank.

07/21/75 1150.7 bound_full_cp_ replaced in SSS

replaced: user

MCR: 1181, 1160: The segments io_call and io_call_msg_ have been added to bound_io_commands_ in the sss library. These additions implement the move_attach operation in the io_call command.

07/21/75 1448.1 bound_io_commands_ replaced in SSS

added: io_call
io_call_msg_

replaced: bound_io_commands_.bind

deleted: io

MCR: 1280: Changes have been made to bound_misc_metering_ and bound_spg_ in the tools library. Segments were changed to now work with combined gate linkage segments. A reset feature was added to bound_misc_metering_.

07/21/75 1517.4 bound_misc_metering_ replaced in TOOLS
added: get_gate_data_
replaced: meter_gate
bound_misc_metering_.bind

07/21/75 1517.4 bound_spg_ replaced in TOOLS
replaced: spg_ring_0_info_

MCR: 1308: The segment get_password_ of bound_admin_rtnes_ has been changed in the tools library. The change fixes a bug in which the segment used /006 and /025 to turn printer on and off.

07/23/75 1004.8 bound_admin_rtnes_ replaced in TOOLS
replaced: get_password_

MCR: 1152: The segment set_tty has been added to bound_io_commands_ in the tools library, to replace the segment lomode. This new command allows a user to set her terminal type and modes for terminal I/O.

07/23/75 1320.7 bound_io_commands_ replaced in SSS
added: set_tty
replaced: bound_io_commands_.bind
deleted: lomode

07/23/75 1320.7 set_tty.info added to INFO

MCR: 1259: The segment delete_ of bound_fscom1_ has been replaced in the sss library. The new version will print an error message for each entry it cannot delete and delete each entry it can.

07/23/75 1346.7 bound_fscom1_ replaced in SSS
replaced: delete_

07/23/75 1519.2 trace_changes.info added to IIS

07/23/75 1607.4 bound_tape_ansi_ moved from AM to SSS
added: tape_ansi_attach_
tape_ansi_parse_options_
tape_ansi_mount_ctrl_
tape_ansi_tape_io_

tape_ansi_interpret_status_
tape_ansi_file_ctrl_
tape_ansi_lrec_io_
tape_ansi_detach_
tape_ansi_nl_file_ctrl_
tape_ansi_ibm_lrec_io_
tape_ansi_control_
tape_ansi_position_
tape_ansi_read_length_

replaced: ascii_to_ebcdic_
 ebcdic_to_ascii_
 tape_status_

deleted: ansi_lrec_io_
 control_
 detach_
 file_control_
 ibm_lrec_io_
 interpret_tape_status_
 mount_control_
 nl_file_control_
 parse_options_
 position_
 read_length_
 tape_ansi_
 tapeio_

moved: bound_tape_ansi_.bind
