FROM: Patricia Dratel  
DATE: August 8, 1975  
SUBJECT: ONLINE INSTALLATION CHANGES

The following is a list of changes to the standard service system, tools, network, unbundled, author maintained and installation maintained libraries for the week beginning August 4, 1975.

**HOW TO READ THIS LISTING:**

Each modification is preceded by the MCR number covering it (if there is one), and a brief explanation of the change.

This information is followed by the name of the object segment, help file, include file, or bound segment (or group of the above) involved in the modification.

Also given is the date and time of installation, and the name of the system library to which the change was made.

For bound segments, a list of the components follows, as well as the action which was taken with regard to each component.

An explanation does not accompany the listing of a segment which was "de-installed", or removed because of some problem, but the original installation information may be considered inoperative.

MCR 1107: A new Multics Graphics System was installed into UNB replacing the existing, but unsupported, version. It provides full functionality for a variety of terminals including the ARDS, CalComp 915/1036, and Tektronix devices. Please type "help graphics", "help graphics\_changes" and "help graphic\_editor" for further information. Also, type "help graphics\_speedup", "help setup\_graphics", and "help remove\_graphics" for additional information.

MCR 1300: Fixes a bug which prevented format\_word\_list (TOOLS) from correctly calculating terminal line length, and, as a result, causing the command to be aborted.

08/05/75 1618.3 bound\_word\_list\_ replaced in TOOLS  
replaced: format\_word\_list

\*\*\*\*\*

No MCR: format\_word\_list (TOOLS) was replaced to fix a bug introduced by yesterday's installation. The new bug prevented its use with the file\_output command.
