Subject: Installation of BOS 1.46b

The BOS system 1.46b was updated at 11:00 AM on Friday, September 26, 1975. Change # 0041 (MCR 1383), which replaced dia_man.map355 in the DataNet 355 core image mcs, fixed a problem in the handling of ARDS terminals which had caused the ARDS to appear as though the screen were always full. Change # 0042 (No MCR), which replaced error.incl.alm and recompiled loaddm.alm, setup.alm, and util.alm, fixed a bug which had caused output to the BOS console to be truncated short of the right margin. There were no changes to the BOS header.
