 Subject: Installation of Salvager 2.32

The Salvager system, 2.32, was updated at 2:15 PM on Tuesday, November 4, 1975. This system included, in addition to updating to hardcore system MSS 27.1a, removal of the eight page slew at the end of the salvager, a change for compatibility with the removal of max\_tree\_depth from active\_hardcore\_data to active\_all\_rings\_data, and an upgrade for the salvager printer software for compatibility with recent changes to the hardcore printer software.

### I. System Change Log

<u>Chng</u>	<u>MGR</u>	<u>Change</u>
0011	1282	Removed the eight page slew from the end of salvager printer output.
0012	1029	Modified salv_activator to find max_tree_depth in active_all_rings_data instead of in active_hardcore_data.
0013	0918	Upgraded the salvager printer control software for compatibility with recent changes to the hardcore printer software.

### II. Segment Change Log

<u>Segment Name</u>	<u>Bound Segment</u>	<u>Change #</u>
periph_io.pl1	bound_util_print	R 0013
salvager.pl1	bound_offline_salvager	R 0011
salv_activator.pl1	bound_offline_salvager	R 0012
utility_print.pl1	bound_util_print	R 0013

## III. Bound Segment Change Log

<u>Bound Segment</u>	<u>Change</u>
bound_offline_salvager	Replaced salvager salv_activator
bound_util_print	Replaced periph_io utility_print

## IV. Header Change Log

Change # 0012 modified the salvager edit\_header to include active\_all\_rings\_data. There were no other changes to the edit\_header.
