Date: November 26, 1975
Subject: Installation of MSS 27.2a, 27.2b and 27.2c

The hardcore system MSS 27.2a was installed at 5:25 PM on Friday, November 7, 1975. Change # 1515 (MCR # 1506), which replaced `del_dir_tree.pl1` in `bound_file_system`, fixed a bug in the handling of the copy switch. Change # 1516 (MCR # 1506), which replaced `link_man.pl1`, `link_snap.pl1`, and `rest_of_datmk_.pl1` in `bound_system_faults`, fixed some of the linker bugs introduced in MSS 27.2. Change # 1517 (MCR # 1525), which replaced `command_processor_.pl1` in `bound_command_loop_`, fixed some of the command processor bugs introduced in MSS 27.2. The system libraries were updated at 10:12 AM on Wednesday, November 12, 1975.

The hardcore system MSS 27.2b was installed at 10:38 AM on Monday, November 10, 1975. Change # 1518 (MCR # 1525), which replaced `command_processor_.pl1` in `bound_command_loop_`, fixed the last bugs in the MSS 27.2 command processor. The system libraries were updated at 10:18 AM on Wednesday, November 12, 1975.

The hardcore system MSS 27.2c was installed at 7:25 PM on Monday, November 10, 1975. Change # 1519 (MCR # 1506), which replaced `rest_of_datmk_.pl1` in `bound_system_faults`, fixed a bug in the MSS 27.2 linker which had caused problems for users of Fortran common. The system libraries were updated at 10:21 AM on Wednesday, November 12, 1975.
