DATE: June 12, 1976
SUBJECT: Installation of MSS 28.7 and 28.7a

MSS 28.7 was installed on Thursday, June 10, 1976. Included in this system are: a fix for MIT bug 410, some or all pages of a segment missing after a crash; a fix for bug 409, out-of-bounds in backup; a fix for miscounting records used; a fix for faults taken during add_volume_registration (avr); a fix for unexpected crawlouts from fs_get_mode; closing of an AST entry window during deactivation to remove a physical volume; a fix for garbage data returned by hcs_Status when user has no_s_permission; a fix for a bad message from force_pd_abandon; code to signal the correct condition when a boundsfault is taken on segment with 0 max length; a fix for the initializer lost interrupt problem; a speedup for segment truncation; new gates to condense logical volumes by forcing segment migration; a new feature to give the owner of a logical volume access to that volume, even if the access control segment (ACS) is missing.

MSS 28.7a was installed on Thursday, June 10, 1976. Included in this system are: removal of one of the fixes made to pcss in 28.7 to solve the Initializer lost interrupt problem; carrying forward to hphcs_ changes made in 28.6 which were omitted in 28.7.

I. System Change Log

Change MCR	Change
# 1523 1876, 1879-81, 1914-5, 1917-22, 1926, 1938, 1940, 1954	Includes all of the changes listed above for MSS 28.7.
# 1624 None	Includes the changes listed above for MSS 28.7a.

Multics Project internal documentation. Not to be reproduced or distributed outside the Multics Project.

II. Segment Change Log

Segment Name	Bound Segment	Change #

II. Segment Change Log (continued)

Segment Name	Bound Segment	Change #
Bindfiles		
bound_file_system.bind		R 1623
bound_page_control.bind		R 1623
bound_system_faults.bind		R 1623
bound_vtoc_man.bind		R 1623

III. Bound Segment Change Log

Bound Segment	Change
bound_disk_util	replaced: accept_fs_disk demount_pv
bound_file_system	replaced: truncate star_ dc_pack verify_lock ring0_init set_sons_lvid
bound_page_control	replaced: page_fault pc bulk_store_control
bound_salvager	replaced: salvage_pv
bound_system_faults	added: vacate_pv replaced: fs_get seg_fault activate search_ast status_ segment_mover
bound_temp_1	replaced: init_pv†
bound_temp_2	replaced: init_sys_var
bound_vtoc_man	added: priv_delete_vtoce replaced: create_vtoce truncate_vtoce get_pvtx

IV. Header Change Log

The header was changed in MSS 28.7 to add the name
priv_delete_vtoce to bouna_vtoc_man.
