

TO: Distribution
 FROM: Peter B. Kelley
 DATE: May 27, 1976
 SUBJECT: Installation of MSS 28.5

The hardcore system MSS 28.5 was installed on Wed., May 12, 1976. This system includes: the ability to demount logical volumes, fixes in AIM auditing, salvager, shutdown, and RPV creepage. It allows the examination of VTOCe's via phcs_; adds the "-pvname" option to the dumper. The system libraries were updated on Thurs., May 13, 1976. MSS 28.5a, installed on Thursday, May 13, 1976, fixes bugs introduced in MSS 28.5 and fixes RPV creepage. MSS 28.5b, installed on Mon., May 17, 1976, fixes a bug affecting I/O disk usage. The system libraries were updated on Thurs., May 13 for MSS 28.5a and on Mon., for MSS 28.5b.

I. System Change Log

Chng MCR

Change

- # 1597 1822,1826,1634,1834,1835,1846,1765,1635,1637,1840,
1669-72,1847-48
Adds the ability to demount logical volumes; fixes bugs in AIM auditing, salvager, shutdown, and RPV creepage. Allows VTOCE examination via phcs_; adds -pvname option to the dumper, disk systems starting with drives other than 1.
- # 1598 1672 Changed convert_authorization_ to only accept a blank access class string if either the long or short names for level 0 are blank.
- # 1599 1669,1670,1671
Changes to audit only bona fide access violations; access denials on directories to be audited properly, and only changes to system privileges to be audited.
- # 1600 1712 Implement the io_call order in tty_.
- # 1601 1793 Corrects isot fault handling.

 Multics Project internal documentation. Not to be reproduced or distributed outside the Multics Project.

I. System Change Log (continued)

Chng MCRChange

- # 1602 1791 Fixes bug in put_field_.
- # 1603 1811 Improves hcs_\$make_seg interface.
- # 1604 1875 Fixes bugs introduced in 28.5.
- # 1605 ---- Fixes bug affecting I/O disk usage.
