SUBJECT: Installation of MSS 28.11c

I.   SYSTEM CHANGE LOG

MCR   MODIFICATION

1806 Add dummy interface to Ring 0 for FNP-loading utilities.
      Future Answering Service will use these.

1967 Change pl1_operators_ to support use of operators for
      allocate and free stmts, and empty built-in function by
      having it reference free_$free_ rather than
      process_data_$area_ptr. The process_data_ segment doesn't
      exist yet.

2063 Fix cu_$grow_stack_frame to remove 61K stack length limit.

2125 Fix IMP DIM to avoid abs wiring temp pages when it already
      has pages wired. Change Host-Host allocation strategy to
      use fewer pages when sending data from Multics back to
      Multics.

II.   SEGMENT CHANGE LOG

SEGMENT NAME   BOUND SEGMENT

fnp_util.pl1   A   bound_mcs_util
hardcore.header   R   -
hphcs_.mexp   R   -
imp_init.pl1   R   bound_imp_dim_
ncp_params_.alm   R   bound_network0_
phcs_.mexp   R   -
pl1_operators_.mexp   R   bound_sss_wired_
rest_of_cu_.alm   R   bound_command_loop_

II.   SEGMENT CHANGE LOG (continued)

BIND SEGMENTS

bound_mcs_util.bind   A
