AVAILABILITY OF ABSI FUNCTIONAL SPECIFICATIONS

by Kenneth T. Pogran

I have just issued a memorandum entitled "Asynchronous Bit Serial Interface -- Functional Specifications" dated April 8, 1974. This document is the up-to-date functional specification of the ABSI designed by Rick Gumpertz, and replaces a draft version issued by Rick as RFC 8, dated February 8, 1973. Anyone interested in obtaining a copy of this memorandum should contact me; it will not be issued as an RFC at this time.
