RFC Index

by Carol Sarner

No.	Title	Published
40	RFC Index	10/15/73
41	Design of a Dynamic Linker Running Outside the Security Kernel of a Computing Utility	10/25/73
42	CSR Task Report	11/06/73
43	Unified User-level Protocol	11/19/73
43A	Unified User-level Protocol	12/07/73
44	A Structured Program Description of Multics Page Control	11/20/73
45	Network User's Supplement to the MPM	1/11/74
46	Some Multics Security Holes which were Closed by 6180 Hardware	1/28/74
47	Some Recently Repaired Holes in Multics	1/28/74
48	Preliminary 6180 Hardware Performance Measurements	1/27/74
49	A Proposal for Removing Name Space Management from Ring Zero	4/09/74
50	Availability of ABSI Functional Specifications	4/18/74
51	Plans for the MULTICS ARPA Network Program Logic Manual	4/26/74
52	CSR Task Report	5/13/74
53	HYDRA: The Kernel of a Multiprocess Operating System	6/10/74

No.	Title	Published
54	List of Documentation in Multics Historical Files in Room 540	6/02/74
55	M.S. Thesis Proposal: A Simple Implementation of Processes as Basis for a Certifiable Computer Facility	7/02/74
56	A Security Kernel Model for Page Control	7/11/74
57	CSR Publications, Talks, and Theses, July 1973 to July 1974	7/18/74
58	A Kernel for ACL-Based Protection Mechanism	8/07/74
59	(Removed from Circulation)	
60	The Protection of Information in Computer Systems	10/04/74
61	CSR Division Annual Progress Report	10/07/74
62	CSR Task Report	10/11/74
63	Performance Improvement in ARPANET File Transfers from Multics	11/07/74
64	A Lost Message Detection and Recovery Protocol	12/02/74
65	The Removal of the Use of Path Names from Ring 0	12/17/74
66	Semantics of Virtual Processor Control Primitives	12/23/74
67	A Network-Wide File System for Multics	2/06/75
68	On Multics System Initialization	2/14/75
69	CSR Task Report	2/19/75
70	(Never Circulated)	
71	Accurate Performance Measurement on the Development Machine: Initial Experiments	4/02/75
72	New Protection System	4/01/75
73	Implementing Extended Type Objects in an ACL-based Protection System	3/30/75
74	A Secure and Flexible Model of Process Initiation for a Computer Utility	4/23/75
