Mr. Henry Nye  
General Electric Company  
575 Technology Square  
Cambridge, Massachusetts 02139

Dear Henry:

Please accept this letter as notification of our desire to terminate use of DSU-10 serial number 111. It has been determined that Multics development is no longer in need of this storage and at the same time the floor space will be required for installation of an IBM 2314.

When you have determined the official last day of use, please let me know. Assuming that this date is any time after 5/15/70, your earliest arrangement for physical removal will be appreciated.

Sincerely,

  
Weston J. Burner, Director  
Information Processing Center
