Dear Phil,

Re: Teletype Adapters G10C-A

In anticipation of increasing the number of supported terminals on our production system, please accept this letter as indication of our intent to add one additional TTY adapter (134.5 baud, 32 lines) to our Production G10C. Installation should be anticipated on or around October 1, 1971.

Although the adapter is already on site and installed I do believe there are cable requirements which must be fulfilled. After you have evaluated the situation, please, let's discuss.

Thank you.

Sincerely yours,

  
Weston J. Burner  
Director
