Subject: Data Sets

The Bell System has announced that it will be offering an answer-only data set, which has been designated as the Model 113B. However, I have not received any official technical references on the 113B as yet. I have secured an in-house New England Telephone Co. document giving some data on the new set, which I am forwarding to you for your information.

As far as I know the Model 113B may be available this summer, at an approximate monthly rental cost of \$15.00. I have indicated to NET that we would be interested in field testing the 113B.

A handwritten signature in cursive script, appearing to read "M. Berlan".
