Per our phone conversation of April 26, the following will serve as a guideline for the distribution for the MULTICS SPS.

1. Because of the size (1,500 pages) of the SPS we will limit its distribution to two copies plus updates to each MULTICS central system site. It is important to note that this is a deviation from the standard policy of five copies of all MULTICS documents per site as described in Product Marketing Bulletin 391 dated January 29, 1973.
2. Because of the sensitive nature of this document (it describes the "innards" of MULTICS) approval of the initial distribution of this document will be through the MULTICS Project Office.
3. Additional copies and updates may be obtained on a subscription basis with MULTICS Project Office approval for \$25.00 per copy per year including updates.
4. I agree with an initial printing quantity of 100 as suggested by T. Dunn.

J. Thomas Zender, Manager
MULTICS Project Office
