Attendees: WJ Burner   RM Gross   ED Kleinow
            RJ Chevalier   DM Jordan   RA Roach
            RC Daley   DA Kayden   LJ Ryan

HARDWARE   ED Kleinow

--Processors - op-not-complete, CPU B. Problem occurred once last
week.

SCU-C - errors occurred - problem with word mother
board

CSM-7 - errors occurred - problem with DLP board -
board replaced and ran okay.

--DSU191 - Area 0 caused crash - FED found timing problem and corrected.

Area 11 arm clamp had to be replaced - running okay now.

--Other hardware - punch peripheral switch seems to be causing strange
problems - i.e., when the switch is used it appears to
have an adverse affect on the IMP.

SOFTWARE   DM Jordan

--Priority 1 bugs (Reference bug list)

272 - This is a new bug - occurred last week.

243 - Wells says he has fix but it is not submitted for installation
yet.

198 - Webber assigned and feels he has located the possible cause
of error conditions - fix not submitted yet.

HARDWARE To Be Installed

--MTH500 - two units are scheduled to ship on 18 March 1974 - expect
arrival by 22 March 1974. Additional two units scheduled
to ship 1 April 1974.

--Bulk Store - second million words scheduled to ship by 31 March 1974.
