 RC Daley ED Kleinow
 RM Gross RA Roach

DSS191 -- Area 4 select locks, Area 2, Area 3 select lock in same period of time. Problem fixed in Area 3; Area 4 in use; Area 2 appears okay.

Memory -- Two parity errors in different memories. Salvager loops with Memory B, Store B. Multics runs okay - waiting for dumps.

MTS500 -- are averaging 10 errors/tape (on saves) at 1600 bpi. It takes 4 minutes/tape with half as many tapes required. Ryan says tapes are being destroyed too often by 500's (probably Drive 3). T/D procedure for bootloading firmware is now working and will be given to operations.

Bug 42 -- fix is in one processor.

SOFTWARE

#243 -- schedule for 23.7 (this week). No change in priority 1 problems.

MIT wants to try eight logical disk channels.

MIT wants CISL to submit page control improvements.

Gross says Bulk Store ships this week.
