HARDWARE - S. D. Sprague

DSU190

- . Unit #1 has had numerous failures. FED swapped 1 board and unit ran fine for about 1.5 weeks. On last Wednesday, the unit failed again with hex19 errors. FED has run T&Ds (off-line) and the disk exorciser (on-line) and will now do hardware checking as time permits.
- . Unit #8. One problem with this device. Status register didn't get reset. FED reset and unit ran okay.

Bulk Store

- . CSM7 failed. FED replaced DLX board.
CSM4 failure disappeared.
CSM2 intermittent problem. FED replaced DLX board.

CPU-A

- . Parity error. FED ran T&Ds but nothing found. No re-occurrence of problem.

SCU-C

- . Store A parity error. FED unable to locate board failure.

DSU0451

- . Two units installed. T&Ds have been run but FED needs a pin connector before check-out can be complete.

SOFTWARE - P. B. Kelley

- . Crash at shutdown with 1 lock set. Trap has been installed.
- . Several problems in page control, shutdown and salvager are being worked on by B. Greenberg at CISL.

Also noted were transfer timing errors, and parity errors during cache load in Processor B.

OTHER

- . Chevalier will insure that the 2 disk packs ordered for the 451's are delivered as soon as possible.
