

w/ Lick, Saltys
back attitudes

Jan 23, 1969

- repeated IPBd feeling of if mixed op. then CS has full hands-on resp.
includes software, button pushing
- (still a joint dev. effort - Chingen)

- "Mac Underwriting is as described in MAC management plan to ARPA"
- "No misgivings if MIT can see its way clear to running a whole machine at some reasonable load (e.g. 2/3) as long as Mills is the judge (and underwriter) of any estimates of use."
- "No objections to a formula for expansion if load grows and felt. Even stronger that it would be a good idea if MIT had an option to expand at its own discretion"
- "Also agreed that Multia user group ^{incorporation by Mills} seemed like a good idea and raised objection when the notion of surveying individuals was discussed"
- "He had ^{no} adverse reaction to Corbath's notion of trying to decouple the initial ^{of} ^{no.} payment of rent issue from amount of service offering"
- "As soon as MIT has 2 nd machine ^{assumed}, the follow-on should be ordered as soon as possible to get more for our money"
