

Are my ideas worth pursuing? What do I want to do next in my life? How do I choose a research topic - there are so many! Is graduate school a good fit for me? How do I develop a professional network? Am I working too hard? Am I on the right path? How can I give a good presentation if I'm so nervous? Is research for me? How could I be better at teaching? Is my advisor a good match for me? What is the right audience for this work? Am I done with my PhD? Why am I doing this research? When am I most excited? What do I value most? How do I learn to mentor others? Should I start a company? Where do I go next? Am I giving the best I can? Why is this important work? So what?

**Ask me  
to ask you  
the questions  
you don't  
ask.**
